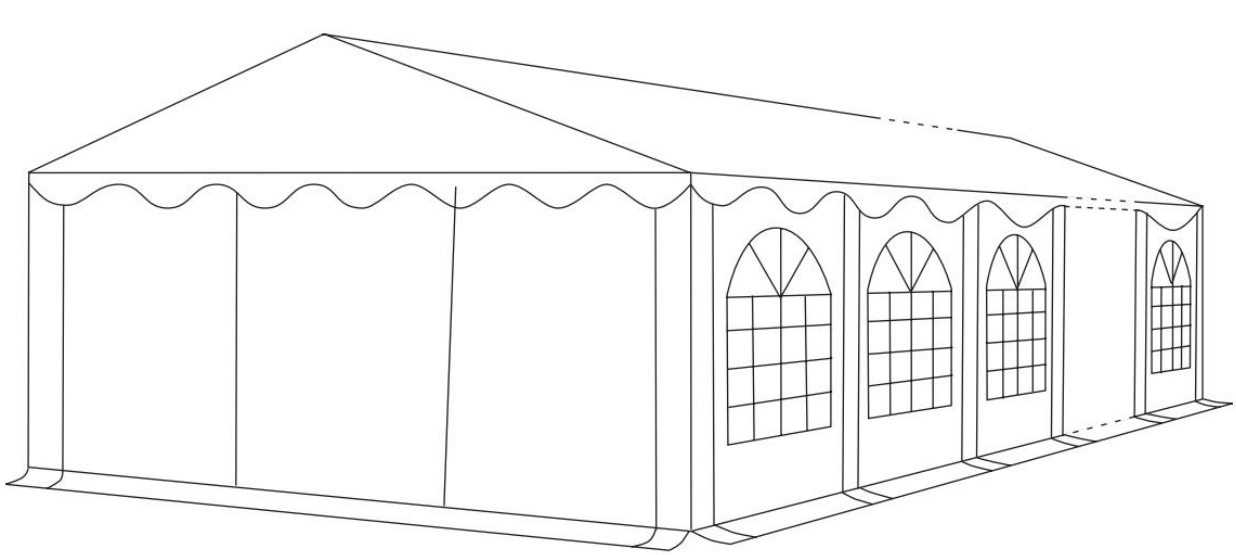
Party Tent



This high-quality tent is flame retardant and therefore can be used for public events. PVC cover according:

FIRE RESISTANT
IGNIFUG
FEUERSICHER
EN – 13501-1

MULTINATIONAL ACCEPTANCE

RO, BG, HU, GR, SRB, MD, D, A, F, GB, IRL, I, E, PL, NL, P, B, CZ, HR, DK, SE, SK, FIN, LT, LV, EST, L

VALID REPLACEMENT

D	DIN 4101 - B1/B2
DK, S, N	SIS 650082
I	UNI 8456
CH	BKZ 5.2
F	NF P 92 - M2

Please read instructions COMPLETELY before assembly. This tent MUST be securely anchored.

This tent is a temporary structure and should be disassembled at harsh weather conditions as stormy winds, snowfall or ice.

Warnings

Prior to installation, consult with all local municipal codes regarding installation of temporary shelters. The owner of the tent has the sole responsibility to make sure that these local rules are followed and that the mounting is correct.

We are not responsible for damage to the unit or the contents from acts of nature.

It is always recommended that you secure your tent properly with storm straps and ground pegs when you put up the structure. Proper Anchoring system selection is your responsibility. Heavy duty Anchor are sold

separately and are not included in this product.
Periodically check the anchors to ensure stability of shelter.
In case of extreme weather conditions, the tent cover must be removed.
Any shelter that is not anchored securely has the potential to fly away causing damage. We are not responsible for any shelter that blows away.
This canopy is intended to protect against the effects of sun, rain, light snow, etc. It is not designed to hold the loads that can accompany wind, rain, snow or ice storms. This structure is not tested for specific snow, rain and wind loads.
Do not use open fire, welding equipment or other ignition sources in the tent.

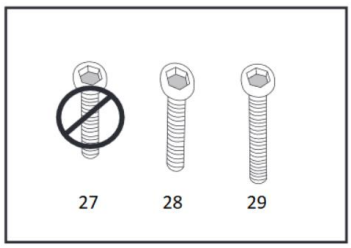
Cleaning and Storage
A tight cover ensures longer life and performance. Always maintain a tight cover. Loose fabric can accelerate deterioration of cover fabric.
Immediately remove any accumulated water, snow or ice from the roof structure.
DO NOT use bleach or harsh abrasive products to clean the fabric cover. Cover is easily cleaned with mild soap and water.

Safety Instructions
Please use gloves and stable shoes when assembling the metal frame portion of this unit. The metal components may have sharp edges and be oily cause of the metal processing.
Snow must be removed from the tarpaulin in a timely manner. Temporary accommodation as tents should be taken down in adverse weather condition like heavy wind, snowfall and ice.
Ensure sufficient distance of the tarpaulin to heat sources, electrical-, gas- and other pipes (min. 1.2m). You can obtain detailed information from your responsible authority.
Pay attention to the following points when choosing a location:
The pavilion must stand on a flat, non-slip and safe place
choose a sheltered location
Avoid damage to the material, please place the pavilion so that it cannot rub or chafe on branches, parts of buildings etc.
Put up the pavilion at a safe distance to fireplaces and pay attention to the direction of the wind
Leave your pavilion to dry in an erected position before packing it away.

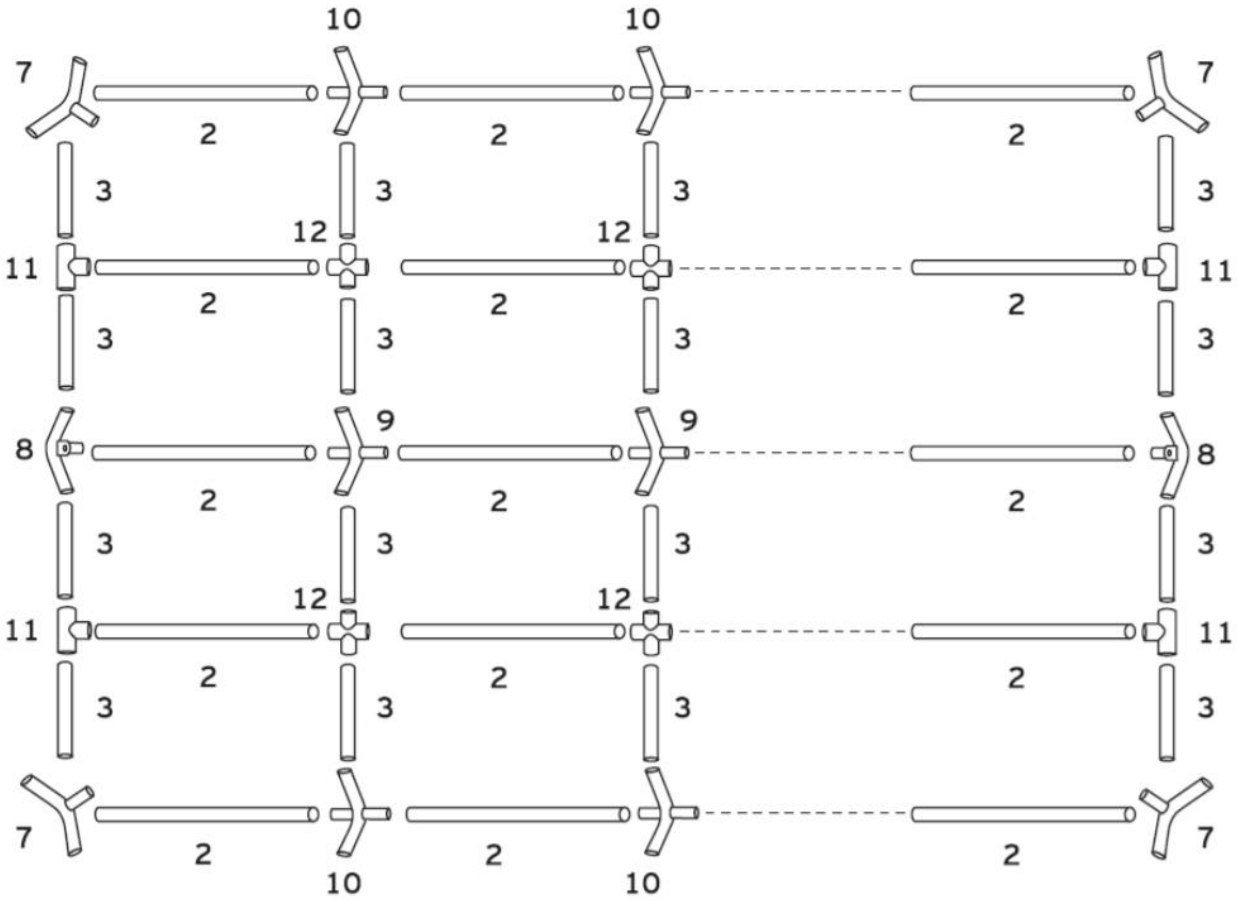
Assembly Instructions

Step 1. Assembly is easiest if you layout all parts on the ground as shown below. 8x8m 4 sections, 8x10m 5 sections, 8x12m has 6 sections, 8x14 has 7 sections, 8x16m has 8 sections, 8x18m has 9 sections and 8x20m has 10 sections.

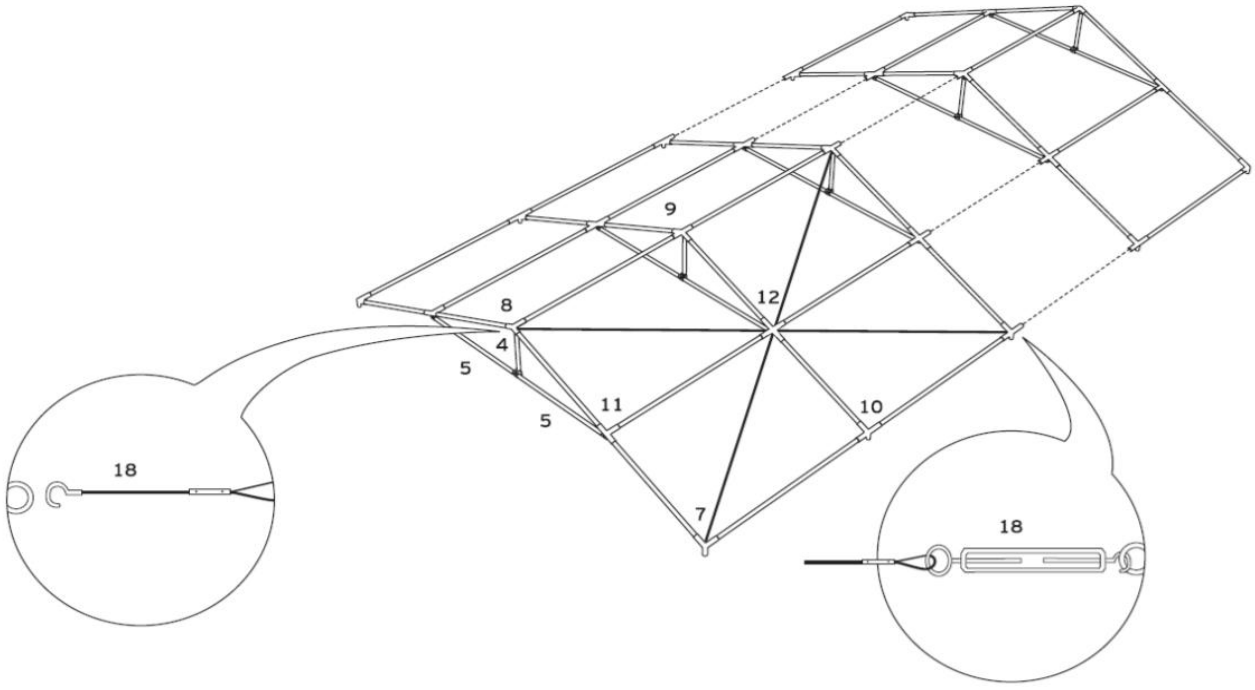
Assemble the roof frame by mounting parts 7 to 12 on the pipes (2, 3).
Use the bolts 28 and 29 to attach the parts and poles together.



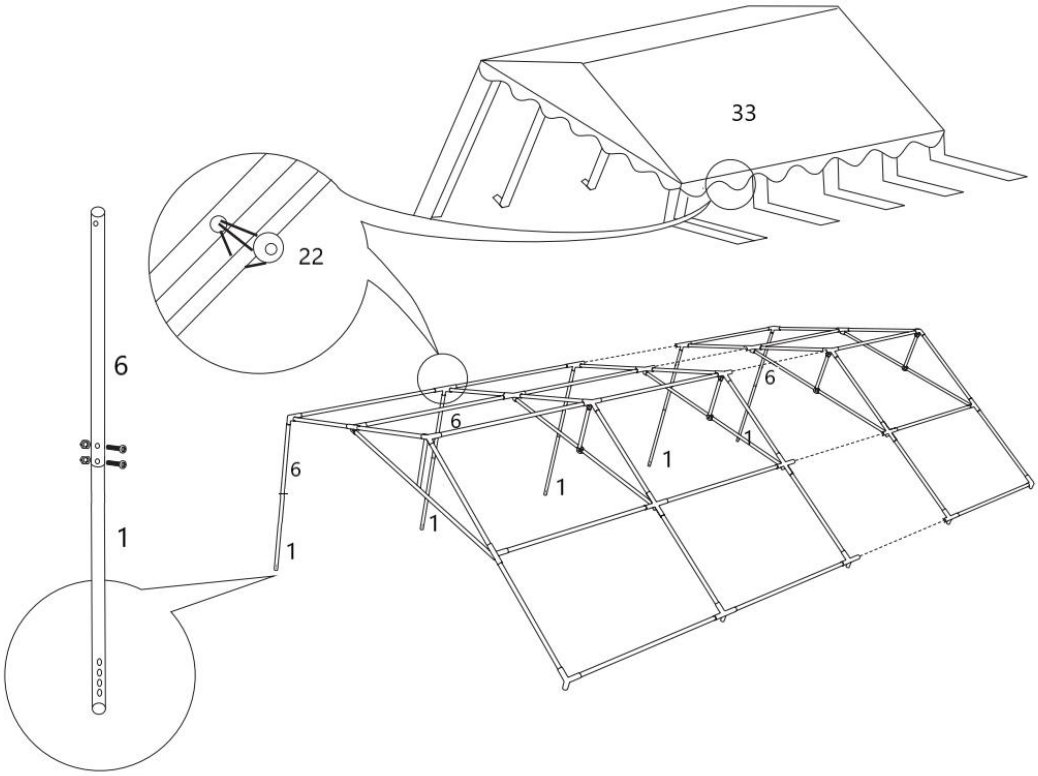
8m - series ★★★★★ELITE – 3m



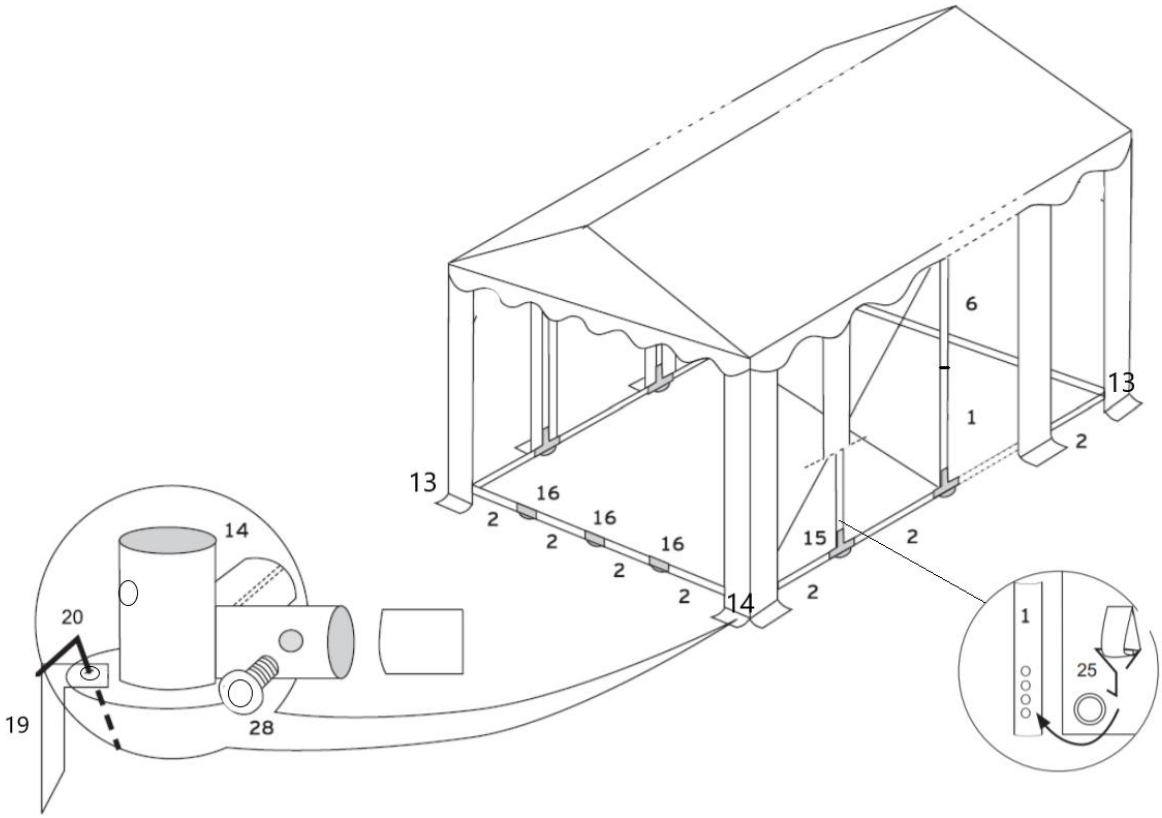
Step 2. Connect the roof poles and connectors from middle and out. Attach the reinforcement braces (4, 5) using bolts (27) and wing nuts (30). Fastening steel wire buckle set for roof (18) which is diagonally across through each two section as shown.



Step 3: Put the roof cover (33) on the frame and insert leg poles (1+6) into one side as shown below.



Step 4. Attach the legs (1+6) on the other side and install the feet (13, 14, 15, 16) at the bottom. Fastening steel wire buckle set for side (17) which is diagonally across through each two section as shown.
Attach the side covers to the poles (1) using hooks (25). Use the long ground pegs (20) to fasten the feet to the ground. Adding tube peg (19) on corner leg feet (13, 14) can make the tent more stable.



Step 5. Unfold the side walls (34) and the end walls (35) and attach the side walls to the frame using the long bungees (22). Attach the end walls directly to the roof using the short bungees (23). Use the short ground pegs (21) to fasten the ground skirts to ground. The guy rope (24) runs from every corner of the tent and is braced using the tube pegs (19).
